What is TrainingPeaks?

Training peaks is a comprehensive platform designed for endurance athletes and their coaches, particularly for the sports of running, cycling, and triathlon.

It is a third party application that allows users to create detailed, structured workouts with intervals, intensity specifics, etc. and then sync with a wide range of devices including Garmin, Apple Watch, Wahoo, Sunto and more. (but Garmin is superior and I live by that)

Why Endurance Athletes?

While those who engage in other sports can use TrainingPeaks to plan and track workouts, TrainingPeaks uses a host of metrics to quantify training load, fitness, fatigue, etc., the data it collects to calculate these metrics pertains more to that collected during longer aerobic activities.

Metric Examples/ Data Processing

TSS (Training Stress Score): Quantifies the total load of a single workout based on duration and intensity (HR). 1 hour of all-out effort equates to a TSS score of 100 according to Garmin's Website.

ATL/CTL: Acute and Chronic Training loads, respectively. Acute represents a 7 day rolling total of TSS, and Chronic represents a 42 day rolling total of TSS.

rTSS/hrTSS: Specialized Training Stress Scores that are calculated for running pace (rTSS) and heart rate (hrTSS) rather than power. These are helpful metrics for activities that are not cycling, as many other metrics use power (wattage), which is generally not applicable in running and swimming.

Workout Analysis Example

System Requirements/Support

- Has both web and desktop/mobile compatability
- Operating Systems: Windows 10, macOS 11 or higher

Web: Works on any modern browser (Chrome, Safari, Edge, Firefox) on both Windows and Mac

Mobile App:

- Android- version 10.0 or newer
- iOS/ Apple Watch: iOS 17.2 or newer, with wachOS 10.7 or greater if using an apple watch

System Requirements Continued

Connectivity:

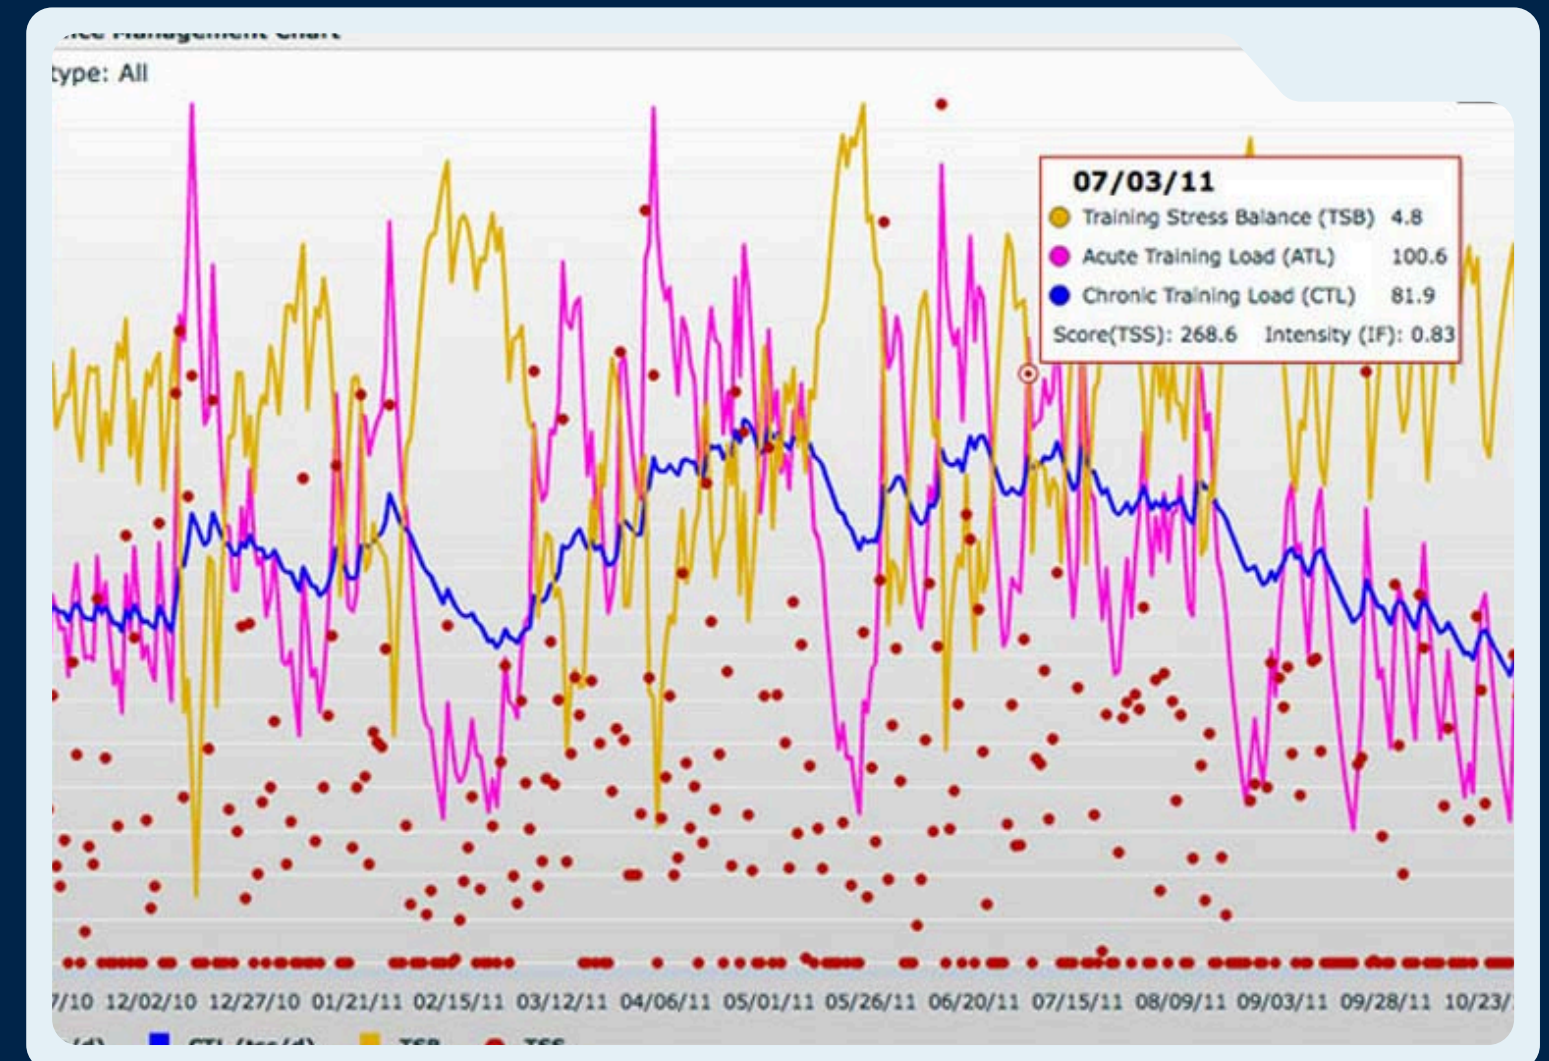

- BLE (Bluetooth Low Energy)
- HRMs (heart rate monitors- optional)
- BLE cadence sensors- optional
- Various other pieces of equipment that are ANT+ compatible (cycling sensors, running foot pods, and more- optional)

Supported Data Formats for Upload:

- .fit (Flexible and Interoperable Data Transfer)
- .tcx (Training Center XML- a type of XML based plain text file)
- .pwx (another type of XML file_

Data Collected

- Any applicable workout metrics as previously listed from connected devices and accessories
- Health and recovery metrics (Heart Rate Variability (HRV), sleep quality, weight, hydration tracking, menstrual tracking, etc
- Geographical data: Location through GPS, weather if applicable, etc

Data Privacy

- Users can submit requests data to be deleted and opt out of sharing
- In addition to third part services, data is shared to your coach that your account is connected to (if applicable)
- No Personally Identifying information (PII) is stored locally. Rather, anonymous codes / IDs are stored on your device, which can only be linked to your through training peak's servers and cannot be match without this server communication

4. PRIVACY & USE OF DATA

We, both directly and through our service providers, collect, maintain, process, use and disclose various types of data to provide you with the Sites and Services. Subject to the terms and disclosures within our [Privacy Policy](#), you grant us permission to access, review, analyze, gather, and otherwise use and disclose your personal information (including sensitive information) collected through your use of our Sites and Services.

Good

Overall a very comprehensive and detailed program that provides many metrics and simplifies the process of athlete-coach communication.

Bad

Cost? There is a free version of the platform, however their premium version costs \$134.99 annually or \$19.95 a month, which is an increase from 2024.

Coach Pricing: \$21.99 a month includes 1 “free” premium athlete and 4 basic athletes, with an additional premium athlete account costing an extra \$9 per month.

Ugly

Potential data concerns? TrainingPeaks Privacy Policy is quite long and those who don't understand the risks of 3rd party apps may not be aware of where their personal information is going

Thank You!
